

One brand – two production sites

BUTTING has expanded its production capacities: In future we will produce high-quality pipes at two sites in Germany.

BUTTING's core business is the manufacture of high-quality longitudinally welded pipes made from stainless steels. Only a handful of companies in Europe can boast of such a long-standing experience and such enormous diversity in the production of pipes. BUTTING has been supplying a wide range of industries for decades, including the food industry, the pharmaceutical industry and biochemistry.

Our staff have qualifications and certification in all current welding processes. We can thus guarantee our customers longitudinally welded stainless steel pipes that are always suited to their specific requirements.

At our main plant in **Knesebeck** (Lower Saxony) we process more than 60 000 tonnes of stainless steels into longitudinally welded pipes and piping components annually.

In **Könnern** stainless steels are processed into pipes in five production halls with a production area of almost 18 000 m². Thanks to our production capacities in Könnern we are well positioned to respond to individual needs with short delivery times.

High-quality pipes

- From DN 15 to DN 1200
- In accordance with DIN EN, ISO and ASTM
- In 15 different material grades

The benefits and advantages for you

- More than 5 000 t in stock
- Individual production of pipes from coil and plate
- Plate pipe production in lengths of 6 m and 12 m
- Expansion of production capacity
- BUTTING raw material warehouse for urgent requirements: plates in 1.4301/1.4307, 1.4401/1.4404, 1.4541 and 1.4571 in wall thicknesses of 3 – 12 mm
- Fast-track: short delivery times for new production from plate, usually approx. 2 to 3 weeks (depending on quantity, design and stock of raw material)
- Additional services: chamfering, radiographic inspection, hydrostatic and mechanical testing, colour coding
- Approvals: DIN EN ISO 9001; DIN ISO 45001; DIN EN ISO 50001; DIN EN ISO 14001; PED 2014 / 68 / EU; AD2000 Data Sheet W0; Lloyds Register; DNV; Shell; BP; Bureau Veritas; Norsok and many others
